"Science in Action," Southern California Edison Co.'s new public service television program, is gaining wide acceptance by school officials as a teaching aid in addition to attracting thousands of viewers of all ages for its entertainment appeal, G. L. Blanchard, Edison district manager, reported yesterday.
Edison announced the availability of classroom worksheet kits for teachers two weeks ago, and more than 900 requests for the kits have already been received, Blanchard said.
"We are extremely pleased with the interest being shown in our TV series, both from educators and the general viewing public as well," he said.

THE KITS are intended to help teachers supplement in their classrooms the material used on the television program each week, he explained.
The half-hour show, presented Thursdays at 7 p.m. over KRCA, explores subjects as new as space travel and as old as the solar system, with Dr. Earl S. Herald, prominent California scientist, as program host.
IN ADDITION to specialized treatment of the subject of each show, Dr. Herald always concludes the program in informative — and sometimes hilarious — fashion by introducing his "Animal of the Week."

This is the first time "Science in Action" has been offered in the Southland, Blanchard pointed out. The show has won 16 national awards, however, and established a three-year average of holding 30 per cent of the total viewing audience in northern California, he said.
"The program has proved conclusively that science and entertainment can be merged satisfactorily," he said.

"The Trujillo, Jr., government in the Dominican Republic is having trouble with the masses. They keep wanting to be people."—Mark Nelson, Fountain Inn (S. C.) Tribune.
